
1. ECAS-ML: Edge Computing Assisted Adaptation Scheme with Machine Learning for HTTP Adaptive Streaming

2. Improving ABR Performance for Short Video Streaming Using Multi-Agent Reinforcement Learning with Expert Guidance

3. Adaptive Scalable Video Streaming (ASViS): An Advanced ABR Transmission Protocol for Optimal Video Quality

4. Intelligent TCP Congestion Control Policy Optimization

5. Real-world Video Adaptation with Reinforcement Learning

6. Improving the Quality of Experience of Video Streaming Through a Buffer-Based Adaptive Bitrate Algorithm and Gated Recurrent Unit-Based Network Bandwidth Prediction

7. SQP: Congestion Control for Low-Latency Interactive Video Streaming

8. A Novel Dynamic Bit Rate Analysis Technique for Adaptive Video Streaming over HTTP Support

9. Flexible QoE Optimized Video Adaptive Streaming over HTTP for Sudden Bandwidth Drops

10. Adaptive Bitrate Streaming in Multi-User Downlink NOMA Edge Caching Systems with Imperfect SIC

1. Artificial Intelligence (AI / Machine Learning / Reinforcement Learning)

Paper	Description
1. ECAS-ML	Uses Edge Computing and Machine Learning to enhance HTTP Adaptive Streaming.
2. Multi-Agent RL for Short Video	Improves ABR performance for short video streaming using multi-agent reinforcement learning with expert guidance.
4. Intelligent TCP Congestion Control	Optimizes congestion control policies in TCP using intelligent/AI-based techniques.
5. Real-world Video Adaptation with RL	Applies reinforcement learning in real-world video adaptation scenarios.
6. GRU-Based Bandwidth Prediction	Combines buffer-based ABR with a GRU model for future bandwidth prediction.

2. Protocols and Congestion Control Algorithms

Paper	Description
3. ASViS Protocol	Proposes an advanced ABR transmission protocol (ASViS) for optimal video quality.
7. SQP Congestion Control	Introduces a new congestion control algorithm designed for low-latency interactive video streaming.
8. Bitrate Analysis Technique	Presents a novel bitrate analysis technique to support adaptive video streaming over HTTP.

3. Buffer Management / QoE (Quality of Experience) Optimization

Paper	Description
6. GRU-Based Bandwidth Prediction	(Also listed above under AI, but relevant here for its buffer management approach.)
9. QoE-Optimized Adaptive Streaming	Focuses on optimizing Quality of Experience (QoE) during sudden bandwidth drops in video streaming.

4. Edge Caching / Computing & NOMA

Paper	Description
10. ABR in NOMA Edge Caching	Adaptive bitrate streaming in multi-user NOMA systems with edge caching and imperfect SIC.
1. ECAS-ML	(Also listed under AI, but relevant here due to its Edge Computing aspect.)
